

Pairwise Spearman rho of t-statistics

Higher = methods rank proteins more similarly

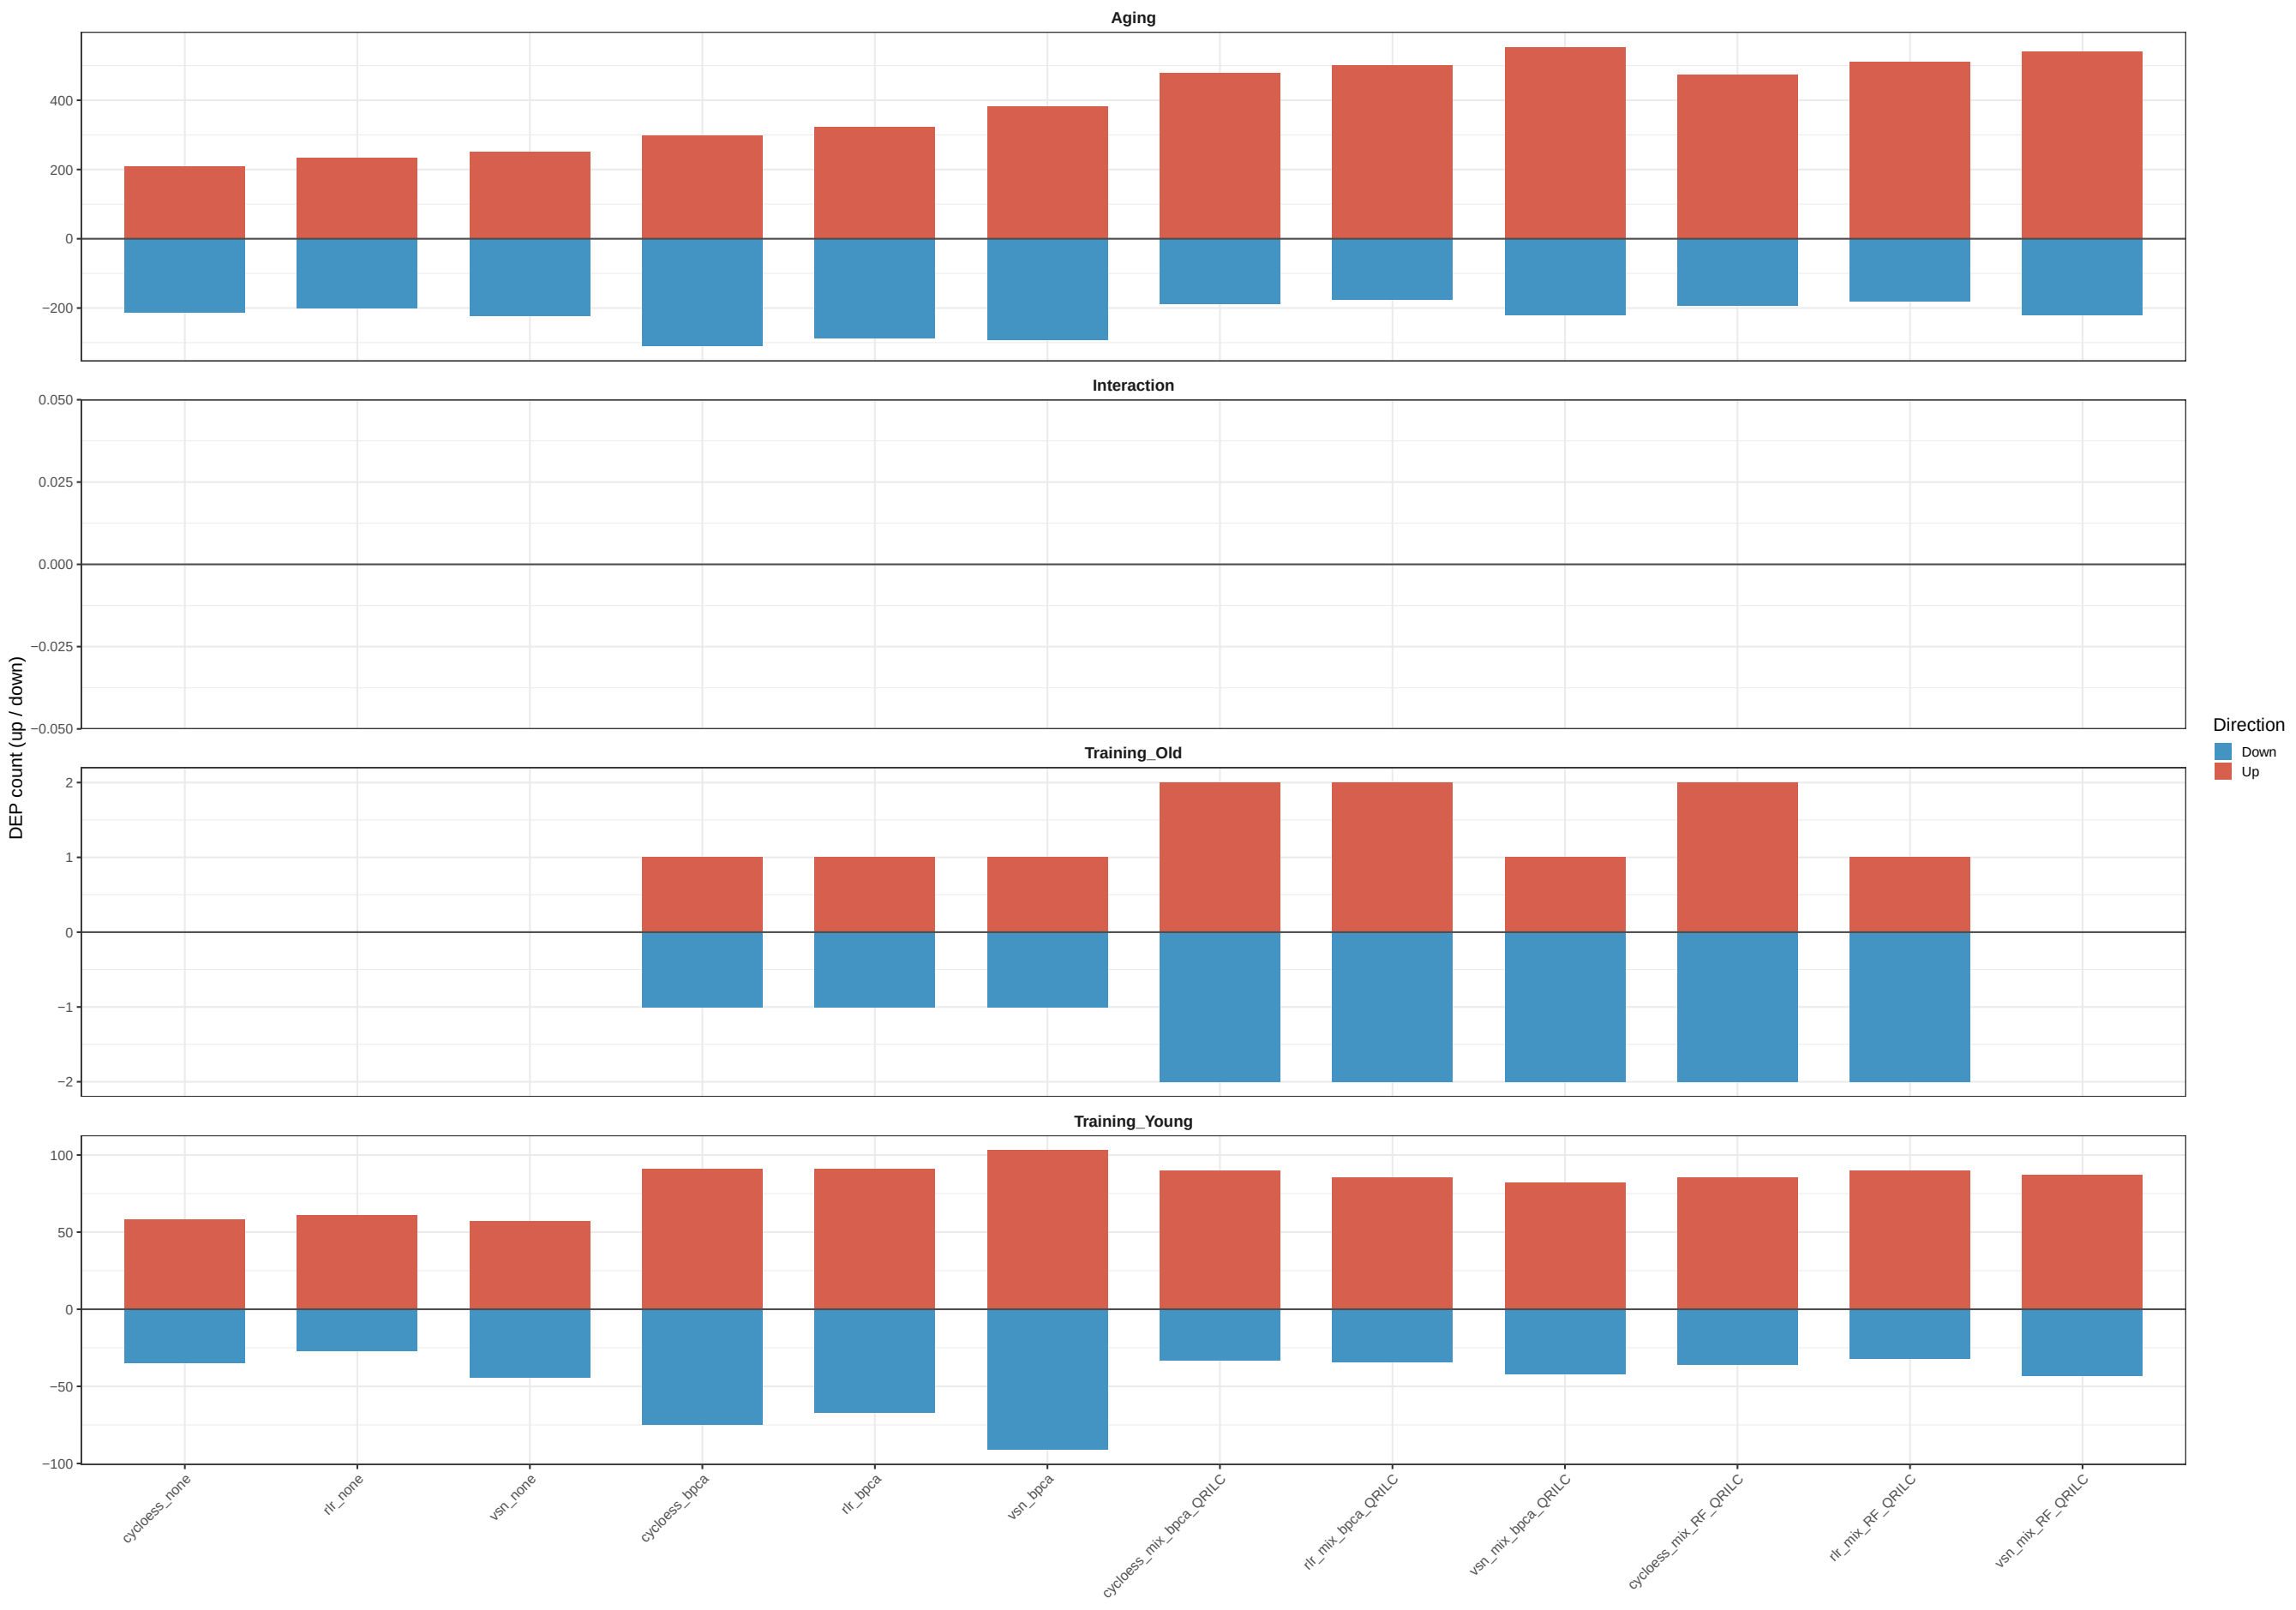

Concordance At the Top (CAT) curves

Each method vs consensus ranking (Irizarry et al. 2005) | Dashed = 0.70

DEP counts per pipeline (FDR < 0.05)

DEP counts across significance criteria

$Pi = p^{|logFC|}$ (Xiao et al. 2014); threshold $Pi < 0.05$
