

A

Raw p-value distribution by contrast

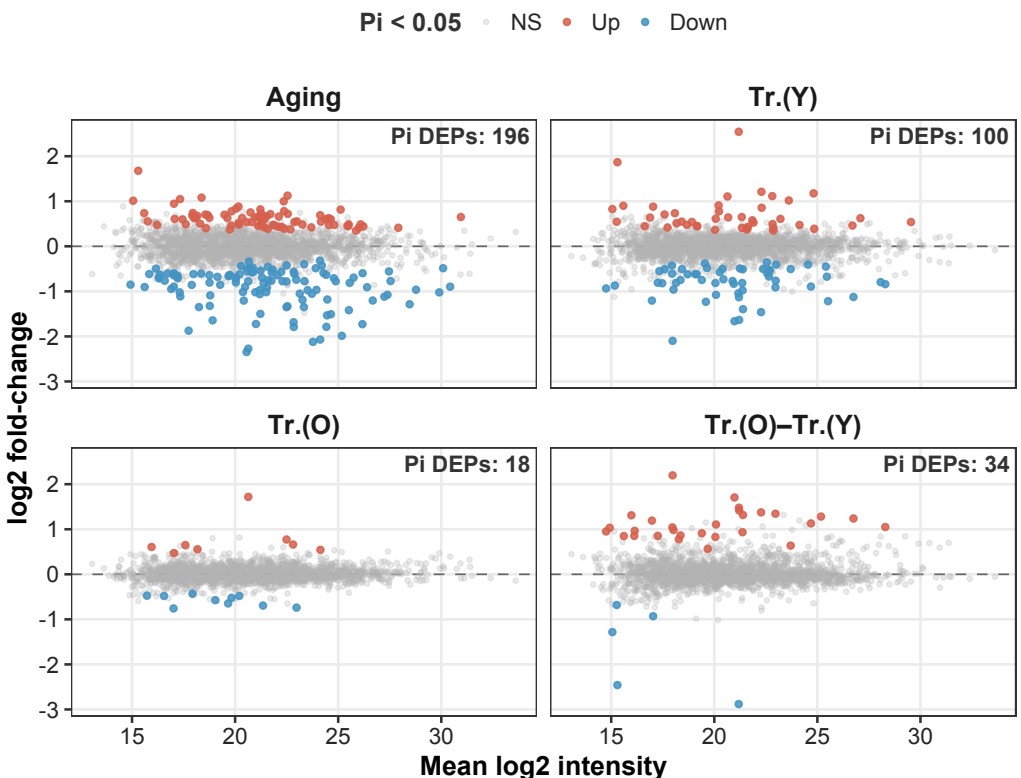

2,113 proteins per contrast | 20 bins | dashed line = uniform null

B

MA plots by contrast

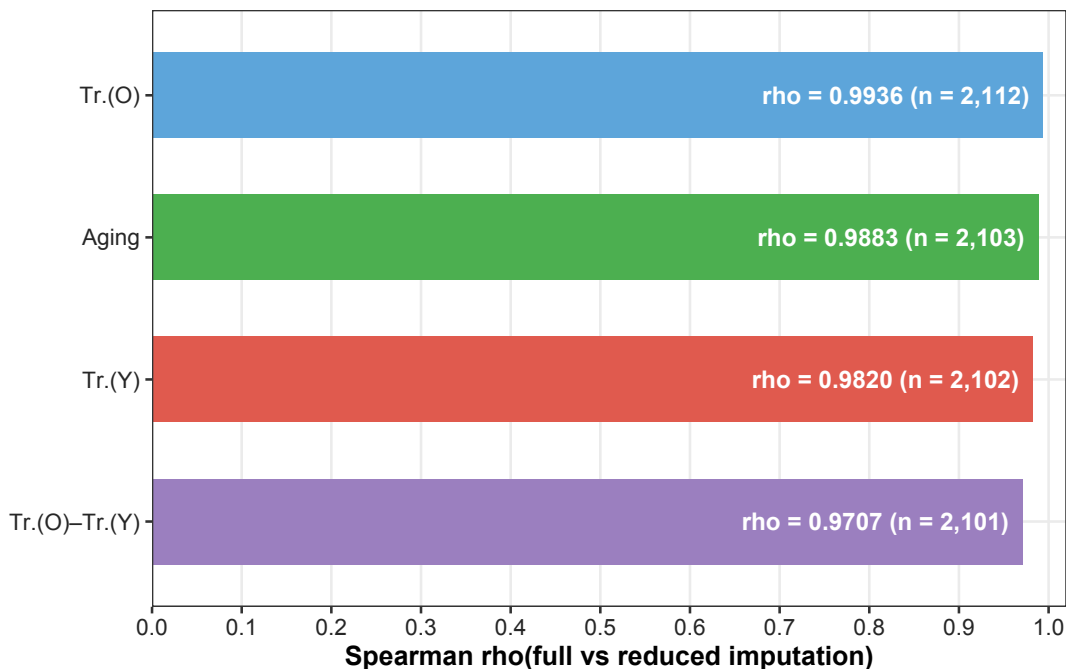

logFC vs mean log2 intensity | red up, blue down (Pi-score DEPs)

C

DEP rank stability under imputation perturbation

Spearman rho(all-methods sensitivity analysis) per contrast | 1.0 = perfect stability

D

DEP count retention after outlier removal

Bars show DEP counts under FULL vs outlier-REDUCED cohort; per-contrast Spearman rho
