

fry Gene-Set Rotation Test: Aging Reversal

Rotation-based set test (exact GSEA analogue) | Circularity $r = -0.336$ | $\text{dupCor} = 0.262$ | $n = 2112$ proteins

Aging-Up DEPs ($\Pi < 0.05$, $n = 80$) $\square$ Tr.(O) ranked t

Reversed (Up $\rightarrow$ Down)

Aging-Down DEPs ($\Pi < 0.05$, $n = 116$) $\square$ Tr.(O) ranked t (n.s.)Reversed (Down $\rightarrow$ Up)
