

A Top 12 per-module ROCs ranked by permutation p

Univariate module eigengene $\rightarrow$ outcome. Border: thick solid black = BH $q < 0.05$, thick dashed black = nominal $p < 0.05$.

B Module-Phenotype Coupling (Age-Dependent)

Stratified Pearson r | 6/180 raw $p < 0.05$ | 0/180 BH-sig
