Figure 1: A schematic diagram of the experimental design for the VNC T-junction. The diagram is divided into four horizontal sections, each representing a different condition. The top section is labeled "VNC T-junction" and shows a green VNC with a red line indicating the path of the T-junction. The second section is labeled "VNC T-junction" and shows a blue VNC with a red line. The third section is labeled "VNC T-junction" and shows a red VNC with a red line. The bottom section is labeled "VNC T-junction" and shows a purple VNC with a red line. To the right of each VNC section is a corresponding graph of "VNC T-junction" showing the relationship between "VNC T-junction" and "VNC T-junction".
