

Does Resistance Training Reverse the Aging Proteome?

Protein-level and pathway-level reversal analysis: Aging vs Training in older adults.

Aging Effect

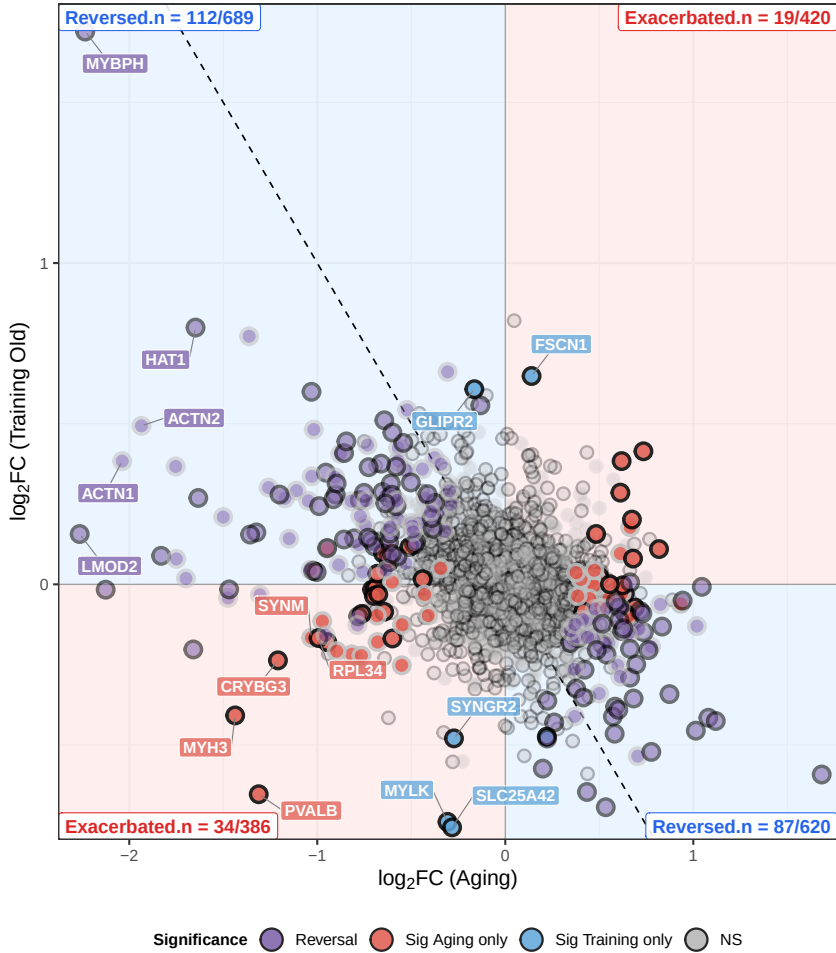

Reversal Effect (Training – Aging)

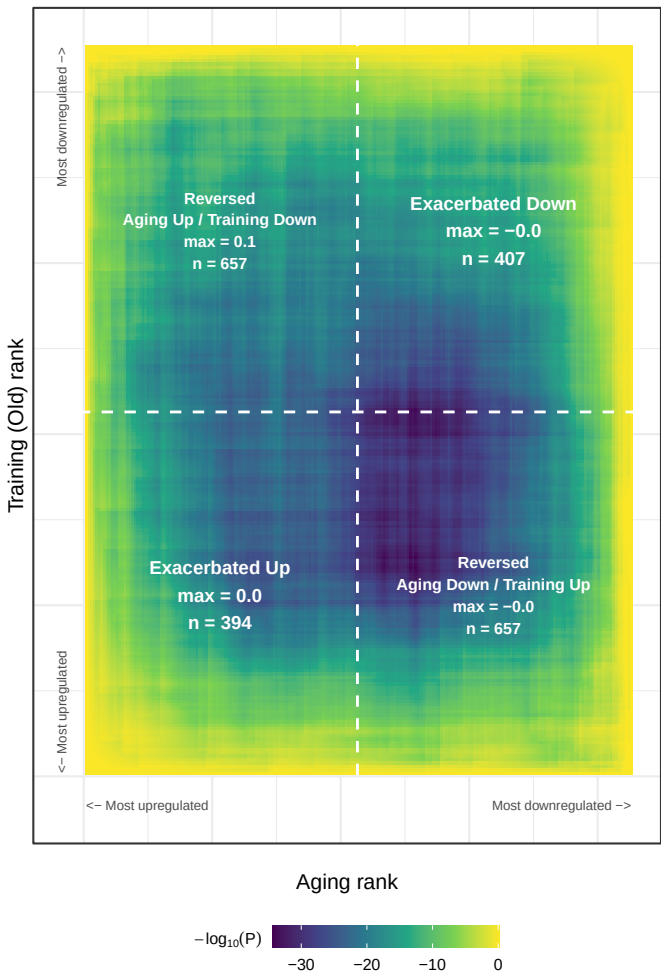

Protein-Level Reversal of Aging by Training

logFC Aging vs Training Old | 2,115 proteins | $r = -0.35$, $\rho = -0.33$, reversal = 67%

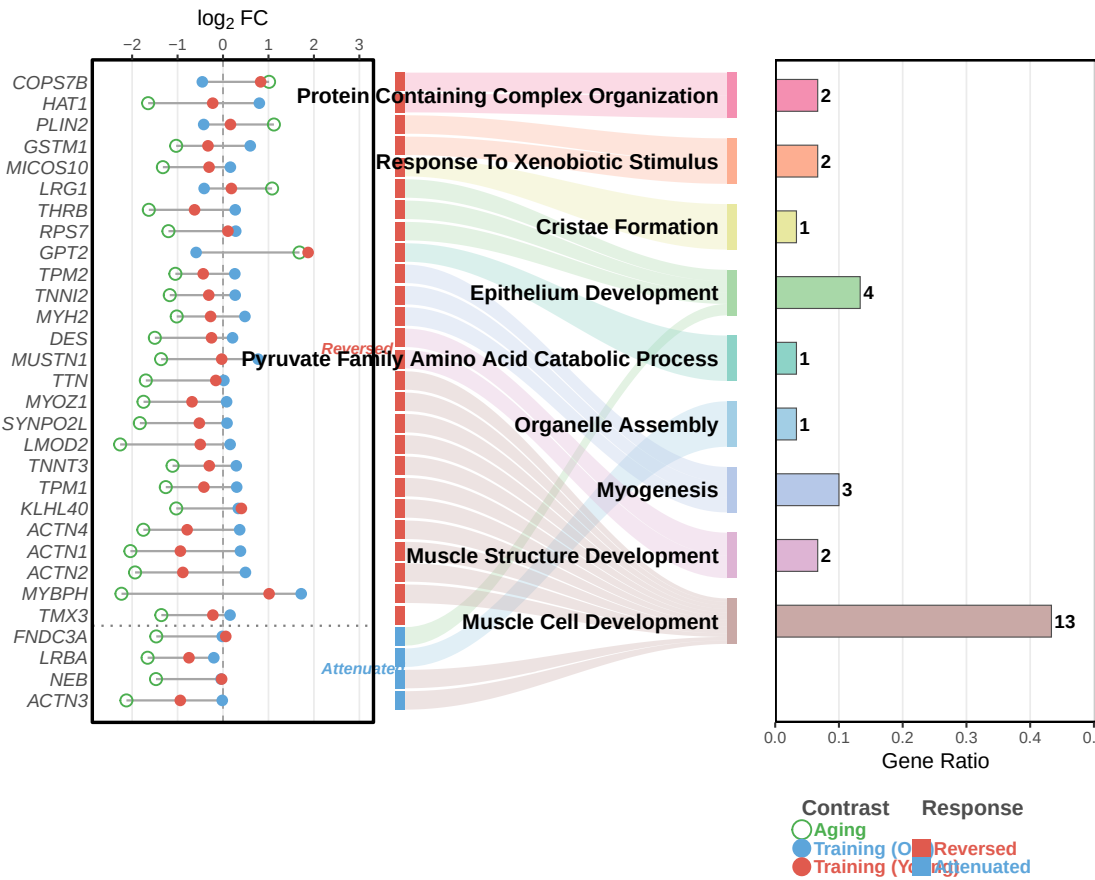

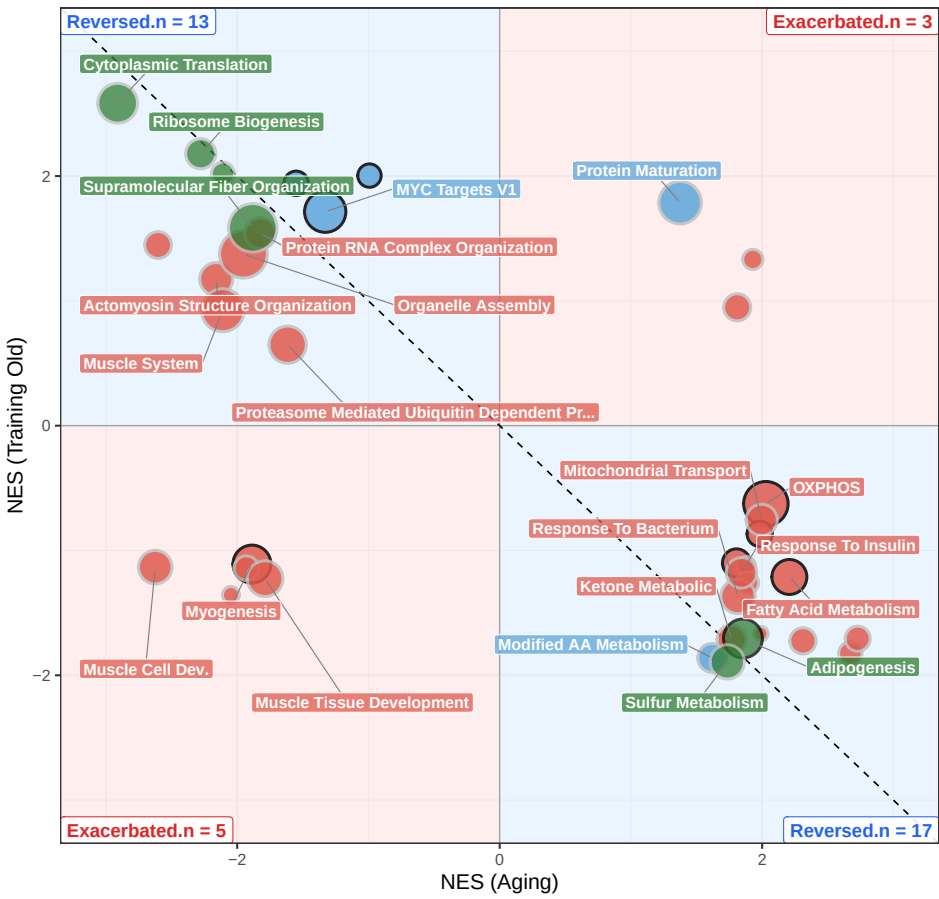

Threshold-Free Reversal (RRHO)

Two-sided hypergeometric overlap | 2115 shared genes | step = 10

Pathway-Level Reversal (fGSEA)

Hallmark + GO:BP (rrvgo-reduced) | padj < 0.05 | 38 pathways | $r = -0.61$, $p < 0.001$

Direction: Up Down Database: Hallmark GO:BP Significance: Reversal Sig Both Sig Aging only
