

B Effect Size Distribution (Log2FC)

Med. |logFC|: Aging = 0.18 [0.17, 0.19], Tr. (Y) = 0.14 [0.13, 0.15], Tr. (O) = 0.09 [0.09, 0.10]
n(|logFC| > 0.5): Aging = 250, Tr. (Y) = 140, Tr. (O) = 29; all pairwise $p < 0.001$ (BH)

Young vs Old |logFC|: KS D = 0.18, $p < 10^{-30}$; Fligner $\chi^2 = 215$, $p < 10^{-48}$
